Professional Summary

A recent Advanced Diploma graduate in Business Information Technology, equipped with a solid foundation in data analytics and front-end web development. Proficient in tools and technologies such as SQL, Python, Power BI, HTML, CSS, JavaScript, and React, I specialize in transforming complex data into actionable insights and creating engaging user interfaces. Driven by curiosity and a commitment to continuous learning, I have self-taught Power BI by building interactive dashboards and performing real-world data analyses. I am quick to learn new technologies and thrive both in collaborative and independent work environments.

Education

Advanced Diploma in Business Information Technology

University of Johannesburg — 2024
